

## TECHNICAL FEATURES

# PANEL SLIM

## PANEL SLIM

## ELEMENT DESCRIPTION

### STRUCTURE

Aluminum extrusion profiles (28 x 28 mm), 100 microns layer epoxy paint. Mechanized sections for easy assembly and disassembly of the panels. Inside the structure there are folded laminated steel sheets (1,5 mm) to fixing the support of table, shelves, hanging cabinets and accessories. Polypropylene caps on the upper finish.

### PANELS

Removable panels for compositions with 60, 80, 100, 120, 140, 160 and 180 cm wide and 110, 135, 160, 185 cm high.

Types of panels:

**A.- Melamine panels:** with particle board and 19 mm thick melamine coating.

**B.- Upholstered panels:** 19 mm thick melamine particules wide and upholstered with different finishes of fabric.

**C.- Polystyrene glass sections:** Protective screens made of 4 mm thick transparent glass polystyrene. with rounded edges. glass polystyrene. has a high chemical resistance, which allows cleaning with chemical products. Its density is 1,36 kg / m<sup>3</sup>.

### PIES

4 mm thick laminated and folded sheet metal foot painted in epoxy with average values between 60-80 microns of coating thickness. This foot is for end panels and freestanding panels. Possibility of leveler or casters.

### DETAILS

Joining between Panel Slim

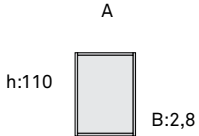

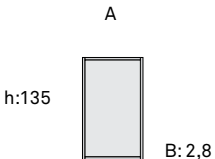

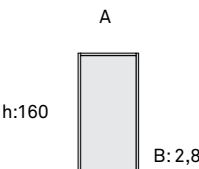

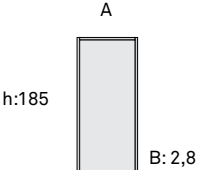

Joining between Panels Slim and Panel System

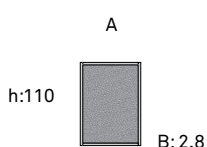

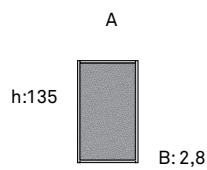

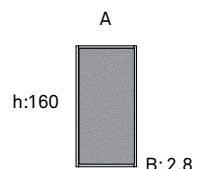

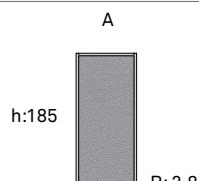

Freestanding panels.

## MELAMINE PANELS

	<b>LOW PANEL, h: 110</b>	A x B	60 x 2,8 80 x 2,8 100 x 2,8 120 x 2,8 140 x 2,8 160 x 2,8 180 x 2,8
	<b>INTERMEDIATE PANEL, h: 135</b>	A x B	60 x 2,8 80 x 2,8 100 x 2,8 120 x 2,8
	<b>MEDIUM PANEL, h: 160</b>	A x B	60 x 2,8 80 x 2,8 100 x 2,8 120 x 2,8
	<b>HIGH PANEL, h: 185</b>	A x B	60 x 2,8 80 x 2,8 100 x 2,8 120 x 2,8

## UPHOLSTERED PANELS

	<b>LOW PANEL, h: 110</b>	A x B	60 x 2,8 80 x 2,8 100 x 2,8 120 x 2,8 140 x 2,8
	<b>INTERMEDIATE PANEL, h: 135</b>	A x B	60 x 2,8 80 x 2,8 100 x 2,8 120 x 2,8
	<b>MEDIUM PANEL, h: 160</b>	A x B	60 x 2,8 80 x 2,8 100 x 2,8 120 x 2,8
	<b>HIGH PANEL, h: 185</b>	A x B	60 x 2,8 80 x 2,8 100 x 2,8 120 x 2,8

## CONFIGURATIONS AND DIMENSIONS

### PANEL MIX: MELAMINE + UHPLSTERED PANELS

## Life Cycle Analysis

### PANEL SYSTEM Program

RAW MATERIALS		
Raw Material	Kg	%
Steel	4,25 Kg	15,9%
Aluminium	5,62 Kg	21%
Wood	16,23 Kg	60,7%
Upholstery / Fill material	0,43 Kg	1,6%
Polypropylene	0,16 Kg	0,6%
Polyamide	0,06 Kg	0,2%

% Recycled material= 68%

% Recyclable materials= 76,8%

## Ecodesign

Results reached during the life cycle stages

### MATERIALS

#### Wood

70% of the wood material is recycled, has PEFC/FSC and complies within the E1 standard.

#### Steel

15%-99% recycled material.

#### Upholstered / Filling material

Filling without HCFC and upholsteries without COVs emissions. Accredited by Okotext.

#### Plastic

30%-40% recycled material.

#### Paintings

Podwer painting without COV emissions

#### Packings

100% recyclable with inks with no solvents.

## PRODUCTION

### Raw materials use optimization

Board, upholstery and steel tubes cut.

### Renewable energies use

reducing the CO2 emissions. (Photovoltaic pannels)

### Energy saving measures

in all production process

### COV global emission reduction

of the production processes by 70%.

### Podwer painting

ecoverly of 93% of the non deposited painting

### Glue removal from the upholstery

### The facilities

have an internal sewage for liquid waste.

### Green points

at the factory

### 100% waste recycling

at production process ans dangerous waste special treatment.

## TRANSPORT

### Cardboard use opmitization

of the packings

### Cardboard and packing materials use reduction

### Flat packings and small bulks

to optimize the space.

### Solid waste compacter

which reduces transport and emissions.

### Light volumes and weights

### Transport fleet renewal

reducing by 28% the fuel consumption.

### Suppliers area reduction

Local market power and less pollution at transport.

## USE

### Easy maintenance and cleaning

without solvents.

### Forma 5 guarantee

### The highest quality

for materials to provide a 10 year average life of the product.

### Useful life optimization

of the product due to a standardized and modular design.

### The boards

with no E1 particle emission.

## END LIFE

### Easy unpacking

for the recyclability or compound reuse.

### Piece standardization

for the use.

### Recycled materials used for products

(% recyclability):

Wood is 100% recyclable.

Steel is 100% recyclable.

### With no air or water pollution

while removing waste.

### Returnable, recyclable and reusable packing

### Product recyclability 76,8%

# MAINTENANCE AND CLEANING GUIDE

---

## MELAMINE PIECES

---

Rub the dirty spots with a wet cloth with PH neutral soap.

---

## PLASTIC PIECES

---

Rub the dirty spots with a wet cloth with PH neutral soap.

---

## METAL PIECES

---

- 1 Rub the dirty spots with a wet cloth with PH neutral soap.
- 2 Polished aluminium pieces can have their polish bak by covering and rubbing them with a dry cottom cloth.

---

## GLASS PIECES

---

Rub the dirty spots with a wet cloth with PH neutral soap.

Do not use abrasive products in any case.

Developed by TANDEM
