

Forma 5

Height adjustable system

M10 / V30 / F25 / LOGOS / ZAMA NEXT / CLASS

HEIGHT ADJUSTABLE SYSTEMS

The height regulation is made by some adjustment glides inserted in the interior of the leg frames. These glides have been designed in order to offer the maximum stability in the highest position. Being aware that the height regulation is normally made just once, during the desk installation process, we gave priority to the desk stability instead of the adjustment easiness. The height adjustable system is available for single desk with leg frame support. These adjustable desks also allow return desks with height eligible system and leg frame supports.

AVAILABLE SERIES

M10

V30

F25

LOGOS

30 mm TOP

650 mm desk minimum height. **850 mm** desk maximum height.
